### **Rabid Dog Must Be Beaten to Death: KCNA Commentary**

Pyongyang, November 14 (KCNA) -- A rabid dog in the U.S. has another fit of spasm, being greedy for power.

Biden bereft of elementary appearance as a human being, much less a politician, again reeled off a string of rubbish against the dignity of the supreme leadership of the DPRK.

A crow is never whiter for often washing. Biden, still going reckless, not coming to his senses though he was censured and rejected by all people, must be a rabid dog only keen on getting at others' throats.

Such rabid dog is second to none in craftiness in seeking its own interests.

A typical example is in 2011 when he, as the then vice-president, categorically rejected the preparations being pushed forward in the U.S. to kill Osama bin Laden.

He reportedly called for reconsidering the operation, because in case the operation goes futile, Obama will not be able to come to power and he will also have to say goodbye to his comfortable life in the White House.

Such a profiteer who ran for the two failed presidential elections has now gone zealous in another presidential election campaign, wandering about like a starving field dog.

He even forgot the name of Obama, whom he had served, and called him his senior, a sign of the final stage of dementia. It seems time has come for him to depart his life.

No wonder, even the Americans call him "1% Biden" with low I.Q., "mad Biden", and "Biden not awakened from a sleep".

Such a guy had the temerity to dare slander the dignity of the supreme leadership of the DPRK. It was the last-ditch efforts of the rabid dog expediting his death.

Biden, listen carefully.

Anyone who dare slanders the dignity of the supreme leadership of the DPRK, can never spare the DPRK's merciless punishment whoever and wherever. And he will be made to see even in a grave what horrible consequences will be brought about by his thoughtless utterances.

Rabid dogs like Biden can hurt lots of people if they are allowed to run about. They must be beaten to death with a stick, before it is too late.

Doing so will be beneficial for the U.S. also.
